

## United States Patents Plus Library

Current through July 18, 2002

Due to the evolving nature of Internet technology, there may be recent changes to the Westlaw interface and functionality that are not reflected in this documentation.

The United States Patents Plus Library integrates patent-related information including full text of U.S. patents, two post-issue databases, and the KeyCite Patent Citator. Each record issued by the U.S. Patent and Trademark Office contains the complete text as it appears in the original document. The Library features utility, design, plant, reissue, statutory invention registrations and defensive publications.

Database

Identifier

### UNITED STATES PATENTS
